\*Beta/4B 0400 is a flocculation pump.

The liquid end is manufactured from plexiglass and the suction and pressure details are of PVDF (Beta/4B 0400 PP). These materials are chosen for their known resistance to the majority of chemicals used in water treatment. The pump can be controlled on/off or externally by pulses from a monitoring and controlling device, for example by using an Autodos with an external cable (extra equipment).

Dosing pump Beta with plexiglass liquid end (NPE) excl. Beta/4B 0400 PPT. All pumps have on/off or frequency control and are supplied with injection and foot valves and 2 m of suction and 5 m of pressure hose.

- **High precision** - Considerable dosing accuracy.
