

VACUUM CLEANER TROLLEY

Item no. 31225

VACUUM CLEANER TROLLEY In large pools and public facilities, it is more practical to use a vacuum cleaner trolley. Stainless steel container with a filter cartridge, filter area 9.7 m², which gives the filter a long operating time. Pump 0.55 kW made of bronze, with high capacity (200 l/min). Air evacuation from the suction hose is handled automatically by the pump. Supplied with 25 metres of cable and motor cutout for a single-phase electrical connection.

- **Pahlén pump made of bronze** - For high quality and long service life.
- **Stainless steel container** - For long life.
- **Equipped with filter cartridge** - Easy to replace when necessary.
- **Convenient operation** - All equipment fitted on one trolley.
- **Supplied complete with ground fault relay** - High safety.
